

## Conformitatea în securitate – Preț vs. Siguranță

**CONFORMITĂȚE** s. f. Raportul dintre două lucruri conforme; potrivire, concordanță (DEX); îndeplinirea unei cerințe (SR ISO 9000:2006)

**EVALUAREA CONFORMITĂȚII** - demonstrarea îndeplinirii cerințelor specificate (3.1) referitoare la un produs (3.3), proces, sistem, persoană sau organism (SR ISO 17000:2005)

**CERTIFICARE** - atestare (5.2) de terță parte referitoare la produse, procese, sisteme sau persoane (SR ISO 17000:2005)

**SISTEM DE SECURITATE** - ansamblu integrat de măsuri organizatorice, tehnice și procedurale care se adoptă în scopul realizării siguranței persoanelor, bunurilor și valorilor (Proiect LSP)

**General SERVICE PROVIDER REQUIREMENTS** for all fields of expertise

**Standard “Services for fire safety systems and security systems”**

- Organization
- Management
- Staff
- Resources
- Procedures
- Documentation

+

**Quality Management System**

The service provider uses a Quality Management System (e.g. ISO 9001).

**Different APPLICATION REQUIREMENTS** in the fields of expertise

**Application Guidelines**

Covering planning, design, installation, commissioning, verification, handover and maintenance.  
Each sector of fire safety systems or security systems may have their own applications guidelines which will give the requirements to enable service provider personnel to plan, design, install, commission, verify, handover and maintain a system.

**Different PRODUCT & SYSTEM REQUIREMENTS** for a field of expertise

**Product Standards**

Each sector may have standard(s) for products called up in the product standards.

**System Standards**

Each sector may have system standard(s) specifying the requirements and performance requirements of the system.

activities  
(CNPSA)

ARTS conference Bucharest June 3<sup>rd</sup> 2015

**Marc Chabaud, Regulatory Affairs Director,  
Delta Security Solutions, France.**

Council for National Private Security Activities (CNPSA)  
How it was established?

Council for National Private Security Activities (CNPSA)  
Internal Organisation

**BOARD**

**TECHNICAL  
COMMISSION:**

**Internal Security Service (ISS)**

- monitoring and new technological developments,
- dialogue with employees,
- training,
- Four qualified personalities.

**OPERATIONAL COMMISSIONS :**

**NCAC**  
**National  
Commission of  
Approval and  
Controls**

**ILCAC**  
**Interregional and  
local commissions  
for approval and  
control across the  
country.**

## Council for National Private Security Activities (CNPSA)

### Funding

**The CNPSA activities are funded by a tax collected by companies, on the model of a VAT system.**

There are two possible contribution rates:

For private security activities it is set at 0.45% of their sales.

For companies that employ their own security service the rate of contribution amounts to 0.65% of gross salaries.

*The tax due is added to customers' invoices.*

## Council for National Private Security Activities (CNPSA)

### How can that model be transposed to Romania?

- Make sure that ARTS' members wish to go in that direction.
- Have the right contacts with government representatives and get them to approve of such an innovative idea!
- Prepare to train future government's inspectors and therefore set up the conditions against which the inspections will take place => chart.
- Carefully avoid confusions between inspections bearing on the legal setup and day-to-day practice of activities with inspections bearing on professionalism.

Council for National Private Security Activities (CNPSA)
